About Me

I am a recent graduate with a major in Software Engineering. I bring a strong foundation in web development, including expertise in HTML, CSS, and JavaScript. My academic projects, such as creating dynamic and responsive websites, showcase my ability to apply theoretical knowledge to practical solutions. I am enthusiastic about contributing with my skills and learning from experienced professionals in a dynamic work environment.

Experience

- 21 November 2023
SPP payment application
Competence Test

This tuition payment application was created using the Laravel framework version 10. This application was created to fulfill the requirements for the Skills Competency Test for the Software Engineering major.
- 13 November 2023
Web Design
FKOM Festival

I participated in a web design competition on November 13, 2023, at the FKOM Festival event. In the implementation of this project, I used Next.js to create the website pages.
- 26 June 2023 - 27 June 2023
Secret Messages
Personal Project

The "secretmessage" project is created with the purpose of sending secret messages to me. The website is built with Next.js as the frontend and Laravel as the backend. This project utilizes a MYSQL database.
